INTRODUCTION

New Mexico State University (NMSU) is the land grant university of the state of New Mexico. As a thriving center of higher education, deeply rooted in the southwestern tradition, its role as a comprehensive university is recognized throughout the state. NMSU offers a wide variety of programs through the Graduate School and the colleges: Agriculture & Home Economics, Arts & Sciences, Business Administration & Economics, Education, Engineering, and Health & Social Services. The 22 doctoral programs are limited primarily to agriculture, education, engineering, and the sciences; the specialist in education degree is offered in 3

study areas, there are 50 master's degree programs and 74 baccalaureate degree programs. At its four branch community colleges, Alamogordo, Carlsbad, Dona Ana and Grants, NMSU offers academic, vocational/technical, and continuing education programs. In accord with its land-grant mission, NMSU provides informal, off-campus educational programs through the Cooperative Extension Service. Through a statewide network of 13 research facilities, the Agricultural Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life.

Overall responsibility for the university resides in an autonomous Board of Regents appointed by the Governor of the State and confirmed by the State Senate. The Board delegates authority for the internal management of the institution to the president. The faculty elects a Faculty Senate which has legislative jurisdiction over policies affecting the academic mission of the university.
