INTRODUCTION

While New Mexico was still a territory, 23 years before it was to become the 47th state of the United States, the settlers of the Mesilla Valley recognized the need for an advanced educational system. This recognition, and the energetic efforts of leading citizens, resulted in the founding of the Las Cruces College in 1888. The territorial legislature of 1889 established the land-grant agricultural college and experiment station which officially opened on January 21, 1890. During its first full academic year, the college became known as the New Mexico College of Agriculture and Mechanic Arts, the first degree-granting institution in the territory. In 1960, the growth and maturity of the college were formally recognized when the New Mexico Constitution was amended to change the name of the institution to New Mexico State University. Since 1963, the institution has held continuous accreditation status, at the doctoral level, by the North Central Association of Colleges and Schools. New Mexico State University, under the provisions of the Morrill Act of 1862 and subsequent federal legislation, continues to provide a liberal and practical education for students and to sustain programs of research, extension education, and public service. New Mexico State University is classified as a Carnegie Doctoral/Research Universities-Extensive and is a member of the Hispanic Association of Colleges and Universities (HACU).

New Mexico State University is the land grant university of the state of New Mexico. As a thriving center of higher education, deeply rooted in the southwestern tradition, its role as a comprehensive university is recognized throughout the state. New Mexico State University offers a wide variety of programs through the Graduate School and the colleges: Agriculture and Home Economics, Arts and Sciences, Business, Education, Engineering, Extended Learning and Health and Social Services. The 20 doctoral programs are limited primarily to agriculture, education, engineering, and the sciences; the specialist in education degree is offered in 2 study areas; the education doctorate degree is offered in 2 study areas; there are 50 master's degree programs and 81 baccalaureate degree programs. At its four branch community colleges, Alamogordo, Carlsbad, Doña Ana and Grants, New Mexico State University offers academic, vocational/technical, and continuing education programs. In accord with its land-grant mission, New Mexico State University provides informal, off-campus educational programs through the Cooperative Extension Service. Through a statewide network of 9 research facilities, the Agricultural Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life.

Overall responsibility for the university resides in an autonomous Board of Regents appointed by the Governor of the State and confirmed by the State Senate. The Board delegates authority for the internal management of the institution to the president. The faculty elects a Faculty Senate which has legislative jurisdiction over policies affecting the academic mission of the university.

Las Cruces & Community College Campuses

New Mexico State University consists of five campuses. The Las Cruces campus and Doña Ana Community College are located in the city of Las Cruces; the Alamogordo Community College is located in the city of Alamogordo, which lies in the foothills at the base of the Sacramento Mountains; the Carlsbad Community College is located in the southeastern corner of the state in the city of Carlsbad; and the Grants Community College is located in the city of Grants in the northwestern corner of the state. In addition, the Las Cruces campus provides courses and academic programs via distance education technologies.

New Mexico State University

Board of Regents

Steve Anaya, Appointed Regent from Albuquerque for term expiring January 1, 2009

Laura M. Conniff, Appointed Regent from Las Cruces for term expiring January 1, 2013

Blake Curtis, Appointed Regent from Artesia for term expiring January 1, 2011

Bob Gallagher, Appointed Regent from Santa Fe for term expiring January 1, 2009

Ed Kellum, Appointed Regent from Las Cruces for term expiring January 1, 2009 (Student Regent)

Ex Officio Members

Joe Pfeiffer, Chair, Faculty Senate

Justin O’Connell, President, Associated Students of NMSU

Administration

President, Interim Waded Cruzado

Provost and Executive Vice President, Interim..... Robert Moulton

Business and Finance, Vice President Jennifer Taylor

Distance Education and Extended Learning, Vice Provost/Associate Provost for Student Success
And Academic ProgramsCarmen Gonzales

Planning, Physical Resources and University Relations, Senior Vice President Benjamin Woods

Planning and Information Technology, Associate Vice Provost Shaun Cooper

International and Border Programs, Dean Everett Egginton

Research, Graduate Studies & International Programs, Vice President Vimal Desai Chaitanya

Student Affairs and Community Colleges, Associate Provost, Interim..... Ramon Dominguez

University Advancement, Vice President Nick Franklin

Economic Development, Vice President Garrey Carruthers

New Mexico Higher Education Department
(Formerly Known as the Commission on Higher Education for the State of New Mexico)

A new cabinet-level Higher Education Department (HED) was created in 2005 and will report directly to the Governor, thus elevating the importance of higher education in the state and allowing the Cabinet Secretary to have a more direct impact on policy. The HED will be responsible for a statewide agenda for higher education: increasing access to our colleges and universities and coordinating efforts to build a highly trained workforce and high-wage economy, thus expanding opportunities for all New Mexicans.

New Mexico State University's Peer Institutions*

In Region:

Colorado State University – Fort Collins
Iowa State University – Ames
Kansas State University – Manhattan
Montana State University – Bozeman
Oklahoma State University – Stillwater
Oregon State University – Corvallis
Texas Tech University - Lubbock
University of Arizona – Tucson
University of Idaho - Moscow
University of Nevada - Reno
University of New Mexico – Albuquerque
University of Texas – El Paso
University of Wyoming - Laramie
Utah State University – Logan
Washington State University – Pullman

* The peer institutions were selected by the Living the Vision Committee and approved by the Board of Regents, 2008.

College of Agriculture and Home Economics

In 1889, the territorial legislature authorized the New Mexico Agricultural College and Agricultural Experiment Station at Las Cruces. Today, the dean and chief administrative officer assumes the overall leadership of the three interrelated components of the college: academic programs, Agricultural Experiment Station, and the Cooperative Extension Service. Academic programs included instructional activities in eight academic departments. The Agricultural Experiment Station funds many of the research projects carried out in the academic and nonacademic departments, as well as the Agricultural Science Centers throughout the state. Faculty and staff of the Cooperative Extension Service primarily teach informal, out-of-the-classroom educational programs in agriculture, home economics, community development, and 4-H and youth development throughout the state. Additional departments in the college are Agricultural Communications and the Indian Resource Development Program.

College of Arts & Sciences

The College of Arts and Sciences traces its origin to 1917 when it was known as the School of General Science. The present College of Arts and Sciences is comprised of 23 academic departments, the College Advising Center and the Research Center. Administered by the dean and two associate deans, the college provides programs of research and creative endeavors in the arts, humanities, sciences, and social sciences.

New Mexico State University

College of Business

The College of Business was created in 1964. The dean of the college assumes leadership of five academic departments and the Bureau for Business Research. The college has been predominantly oriented toward teaching at the undergraduate level and, in more recent years, graduate-level programs. The college has developed substantial research for competencies focused upon New Mexico, Mexico and other border economic, business, and social issues; leadership and substitute-for-leadership issues; and issues in public utility regulation.

College of Education

The College of Teacher Education became the College of Education in 1967. The dean and associate deans of the College provide leadership for five academic departments and the Educational Research Center. The undergraduate and graduate programs prepare individuals for licensure to work in public and private schools. The College, as a whole, is accredited by the State Department of Education within New Mexico and the National Council for the Accreditation of Teacher Education.

New Mexico State University

College of Engineering

Engineering education was an early part of the course offerings of the New Mexico College of Agriculture and Mechanic Arts, now known as New Mexico State University. Leadership for the College of Engineering is provided by the dean, associate and assistant deans, and director of the Engineering Research Center. Today, there are seven academic departments in the college. Research administered by the Engineering Research Center is a vital part of the college's activities. All of the programs in the College of Engineering are accredited by the Accreditation Board for Engineering and Technology (ABET), the nationally recognized engineering accreditation agency.

College of Extended Learning

New Mexico State University is making higher education more accessible to people who may not be able to pursue their education through traditional means because of distance, time constraints, or family and work responsibilities.

The College of Extended Learning provides comprehensive distance learning opportunities to meet diverse educational and professional needs anytime, anywhere. As New Mexico's land-grant institution, NMSU has a university-wide mission to expand the capacity of extension, outreach, and distance education to communities across the state.

The distance education degree programs are designed to serve students who may not be able to pursue an education through traditional means. The College of Extended Learning offers Bachelor degree completion programs, Masters and Doctorate programs, and a number of Certificate and Licensure options.

College of Health & Social Services

The College of Health and Social Services, established in 1979, is administered by the dean and associate dean. The college brings together fields of study that apply directly to the quality of life in a rapidly changing society. In addition to three academic departments, the college has a research center, which provides assistance to the faculty in the conduct of scientific research and professional training. A part of the college's School of Social Work is the Family Preservation Institute, an educational research and training center that engages in activities related to family preservation in multi-cultural settings. The college's Health Science Department is affiliated with the Southern Area Health Education Center (SoAHEC), Border Health Education Training Center (BHETC), Border Health Office (BHO), and the Border Epidemiology and Environmental Health Center (BEC).

Honors College

New Mexico's only honors college was established in the Fall of 2004. The Honors College provides motivated undergraduate students with opportunities to enrich their academic programs. Small classes taught by master teachers engage Honors students in lively discussions and collaborative investigations of interdisciplinary topics. The Honors College does not offer a degree, but supplements the degrees offered by the university's six academic colleges by awarding various levels of honors distinction – core honors, university honors and distinction in university honors – to students who complete the prescribed honors track.

Graduate School

Although the first master's degree was awarded in 1897, the Graduate School was not formally established until 1956. The Graduate School offers 20 doctoral programs; 2 study areas for the education specialist degree; and 50 master's degree programs. The dean and associate dean provide the leadership for the Graduate School. Graduate faculty involvement in generation of academic policy and operating procedure is achieved primarily through the Graduate Council.

Graduate Degrees

Master of Accountancy	Master of Science in Chemical Engineering
Master of Agriculture	Master of Science in Civil Engineering
Master of Applied Geography	Master of Science in Electrical Engineering
Master of Arts	Master of Science in Environmental Engineering

New Mexico State University

Budget & Finance

As a public institution, New Mexico State University is funded, in part, through an appropriation by the New Mexico legislature and the governor. The state budget approval process authorizes general fund appropriations as well as overall expenditure levels. General fund appropriations for Instruction and General (I & G) are largely the result of a workload-based funding formula and are made as one lump-sum appropriation to each campus. In addition, line-item appropriations provide partial support for a number of research and public service activities of the university. The state also appropriates funds to New Mexico State University on a project-by-project basis for capital improvements.

New Mexico State University

Research

Since its founding as New Mexico's land-grant college in 1888, New Mexico State University has encouraged and supported creative scholarly activity of its faculty and students. New Mexico State University is among the top 110 colleges and universities in research and development in the nation, and in the top 28 institutions nationally without medical school in terms of R&D expenditures. Most early research followed mandates of the founding legislation of land-grant colleges by generating knowledge useful in agriculture and engineering. Over time, however, research has expanded from this focus on applied natural sciences to include all disciplines of the university. Today, creative scholarly activity leads to basic scientific discoveries as well as practical applications emanating from the natural and social sciences, arts, humanities, business, education and health sciences in addition to engineering and agriculture. This creative activity enriches academic program for students, provides training and employment opportunities, and attracts externally funded support to enhance university research, academic programs and facilities.

In 2005, to increase New Mexico State University's capacity to respond to critical, state and national needs requiring interdisciplinary approaches, the university established five strategic Research Clusters:

- Biosciences
- Information Sciences and Security Systems
- Natural Resources Sustainability and Renewal
- Southwest Border Regions Health, Education, Culture and Development
- 21st Century Space and Aerospace

These clusters function under the guidance and supervision of the Vice President for Research. The Clusters include faculty and staff from many colleges who have organized themselves, by areas of interest and experience, into thematic subclusters. More information is available at <http://research.nmsu.edu/>.

New Mexico State University

Academic Centers and Research Institutes

Agriculture Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life.

Bureau for Business Research and Services provides business and economic research services to the public and private sectors of the state, region, and country and management services to business organizations and associations, government agencies and the public.

Chihuahuan Desert Rangeland Research Center (CDRCC) conducts educational, demonstrative, and experimental development with livestock, grazing methods, and range forage including investigation of the sustainability and management of natural resources and environmental ecosystems. CDRCC is a major source of arid land research.

Institute for Energy and Environment (IEE) is a multidisciplinary, energy sector and water resource institute serving the Southwest and beyond. IEE develops innovative solutions through the synergy of an academic, governmental and private sector partnership. IEE's ultimate goal is to provide global leadership, expertise, and technology for public policy, technical and human resource development to meet growing energy and water needs.

Manufacturing Technology and Engineering Center (M-TEC) supports economic development in New Mexico by providing quality manufacturing education, technical assistance, and other extension services to industries in New Mexico.

Physical Science Laboratory, a nonprofit research and development arm of NMSU, provides a wide variety of research and development services to support defense and space activities around the world.

Water Resources Research Institute's overall mission is to develop and disseminate knowledge that will assist the state and nation in solving water problems.

New Mexico State University

Office of International & Border Programs

International Programs at New Mexico State University was established in 1972 as the Center for International Programs with the goal of coordinating NMSU's international programs, activities and services. In 2002, the Center was renamed as the Office of the Vice Provost for International and U.S.-Mexico Border Programs and lastly changed to Office of International & Border Programs (OIBP). The name change signified two very important concepts, one being the elevation of importance of international activities/programs and the internationalization of NMSU and the second focusing more specifically on the importance of the U.S.-Mexico border. OIBP's mission is to lead NMSU in the development, implementation and evaluation of policies, programs that incorporate an international dimension into the teaching, research, and service functions of the university. Some of the programs and services which OIBP offers are: foreign scholar (J-1) visa services; community outreach programs; international education programs and services; and coordination and development of U.S.-Mexico Border programs.

University Advancement

University Advancement comprises the offices of Alumni Relations, Development, Advancement Services, and the New Mexico State University Foundation. These departments are the critical link to our alumni, community, state and the world. Details on giving and methods of making a gift can be found via the web at: <http://www.nmsu.edu/advance>

Aggie Alumni are linked around the globe with chapters in the United States and Mexico. The International Board of Directors and the Executive Council set goals and policy for the Association. They encourage alums to recruit students, promote active involvement on university boards and committees and foster mentoring/networking opportunities for alums with current and prospective students.

Private philanthropy is the margin of excellence needed to continue the university's unique position as a doctoral research land grant institution. Gifts are requested from alumni, individuals and friends of the university, foundations, corporations and through partnerships with for-profit entities. Givers make their gifts through the New Mexico State University Foundation, a separate, non-profit entity managed by a volunteer board of directors. The overall endowment is in excess of \$100 million dollars. Gifts are made to the Foundation in the form of cash, securities, real estate, tangible personal property, paid up life insurance, bequests, trusts or retirement plans and gifts in kind.

The Advancement Services area maintains the alumni and friends database records. They provide the accounting, receipting and reporting for charitable gifts to the university and the Foundation. As the "institutional memory" for our alumni, this office serves our alumni, colleges and departments on campus and wherever Aggies live and work.

Community Colleges

Alamogordo Community College

Doña Ana Community College

Carlsbad Community College

Grants Community College

The community colleges are designed to help local citizens achieve their personal educational goals and to meet the job training needs of local business, industry, and government. The community colleges offer

- freshman and sophomore academic courses with credits that transfer to four-year colleges and universities,
- vocational-technical certificates and associate degree programs that provide students with basic job skills to enter the work force,
- adult basic education and developmental education to help students acquire basic skills in reading, English, and mathematics,
- noncredit community service and continuing programs for students seeking professional or personal enrichment.
