New Mexico State University

INTRODUCTION

While New Mexico was still a territory, 23 years before it was to become the 47th state of the United States, the settlers of the Mesilla Valley recognized the need for an advanced educational system. This recognition, and the energetic efforts of leading citizens, resulted in the founding of the Las Cruces College in 1888. The territorial legislature of 1889 established the land-grant agricultural college and experiment station which officially opened on January 21, 1890. During its first full academic year, the college became known as the New Mexico College of Agriculture and Mechanic Arts, the first degree-granting institution in the territory. In 1960, the growth and maturity of the college were formally recognized when the New Mexico Constitution was amended to change the name of the institution to New Mexico State University. Since 1963, the institution has held continuous accreditation status, at the doctoral level, by the Higher Learning Commission. New Mexico State University, under the provisions of the Morrill Act of 1862 and subsequent federal legislation, continues to provide a liberal and practical education for students and to sustain programs of research, extension education, and public service. New Mexico State University is classified as a Carnegie Doctoral/Research Universities-Extensive and is a member of the Hispanic Association of Colleges and Universities (HACU).

New Mexico State University is the land grant university of the state of New Mexico. As a thriving center of higher education, deeply rooted in the southwestern tradition, its role as a comprehensive university is recognized throughout the state. New Mexico State University offers a wide variety of programs through the Graduate School and the colleges: Agricultural, Consumer and Environmental Sciences, Arts and Sciences, Business, Education, Engineering, and Health and Social Services. The 23 doctoral programs are limited primarily to agriculture, education, engineering, and the sciences; the specialist in education degree is offered in 4 study areas; the education doctorate degree is offered in 3 study areas; there are 56 master's degree programs and 89 baccalaureate degree programs. At its four branch community colleges, Alamogordo, Carlsbad, Doña Ana and Grants, New Mexico State University offers academic, vocational/technical, and continuing education programs. In accord with its land-grant mission, New Mexico State University provides informal, off-campus educational programs through the Cooperative Extension Service. Through a statewide network of 9 research facilities, the Agricultural Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life.

Overall responsibility for the university resides in an autonomous Board of Regents appointed by the Governor of the State and confirmed by the State Senate. The Board delegates authority for the internal management of the institution to the president. The faculty elects a Faculty Senate which has legislative jurisdiction over policies affecting the academic mission of the university.

New Mexico State University

Las Cruces & Community College Campuses

New Mexico State University consists of five campuses. The Las Cruces campus and Doña Ana Community College are located in the city of Las Cruces; the Alamogordo Community College is located in the city of Alamogordo, which lies in the foothills at the base of the Sacramento Mountains; the Carlsbad Community College is located in the southeastern corner of the state in the city of Carlsbad; and the Grants Community College is located in the city of Grants in the northwestern corner of the state. In addition, the Las Cruces campus provides courses and academic programs via distance education technologies.

New Mexico State University

Board of Regents

Jordan Banegas, Appointed Regent from Las Cruces for term expiring December 31, 2014 (Student Regent)

Kari Mitchell, Appointed Regent from Mesilla Park for term expiring December 31, 2018

Mike Cheney, Chair, Appointed Regent from Hobbs for term expiring December 31, 2016

Javier Gonzales, Appointed Regent from Santa Fe for term expiring December 31, 2014

Ike Pino, Vice Chair, Appointed Regent from Santa Fe for term expiring December 31, 2014

Ex Officio Members

Dennis Clason, Chair, Faculty Senate

David Maestas, President, Associated Students of NMSU

Administration

President.....	Garrey Carruthers
Provost and Executive Vice President	Daniel Howard
Student Affairs and Community Colleges, Vice President & Deputy Provost	Greg Fant
Associate Provost	Roberta Derlin
Administration and Finance, Senior Vice President	Angela Throneberry
External Relations/Chief of Staff, Senior Vice President	Benjamin Woods
Student Affairs & Enrollment Management, Vice President	Bernadette Montoya
Planning and Information Technology, Associate Vice President, Interim.....	Norma Grijalva
Research, Vice President	Vimal Desai Chaitanya
University Advancement, Vice President, Interim	Tina Byford
Economic Development, Vice President, Interim.....	Kevin Boberg
International and Border Programs, Associate Provost	Cornell Menking

New Mexico State University

New Mexico Higher Education Department

(Formerly Known as the Commission on Higher Education for the State of New Mexico)

The cabinet-level Higher Education Department (HED) was created in 2005 and reports directly to the Governor, thus elevating the importance of higher education in the state and allowing the Cabinet Secretary to have a more direct impact on policy. The HED is responsible for a statewide agenda for higher education: increasing access to our colleges and universities and coordinating efforts to build a highly trained workforce and high-wage economy, thus expanding opportunities for all New Mexicans.

New Mexico State University's Peer Institutions*

Colorado State University – Fort Collins
Iowa State University – Ames
Kansas State University – Manhattan
Montana State University – Bozeman
Oklahoma State University – Stillwater
Oregon State University – Corvallis
Texas Tech University - Lubbock
University of Arizona – Tucson
University of Idaho - Moscow
University of Nevada - Reno
University of New Mexico – Albuquerque
University of Texas – El Paso
University of Wyoming - Laramie
Utah State University – Logan
Washington State University – Pullman

* The peer institutions were selected by the Living the Vision Committee and approved by the Board of Regents, 2008.

New Mexico State University

College of Agricultural, Consumer & Environmental Sciences

In 1889, the territorial legislature authorized the New Mexico Agricultural College and Agricultural Experiment Station at Las Cruces. Today, the dean and chief administrative officer assumes the overall leadership of the three interrelated components of the college: academic programs, Agricultural Experiment Station, and the Cooperative Extension Service. Academic programs includes instructional activities in eight academic departments.

The Agricultural Experiment Station (AES) is a system of research faculty and staff from the College of Agricultural, Consumer, and Environmental Sciences at NMSU based in Las Cruces or at one of 12 off-campus agricultural science centers. State appropriations are used to conduct research in three overarching strategic goals and have a direct benefit to the citizens of New Mexico: 1) Sustain agriculture and conserve natural resources, 2) Enhance NM community and economic development, and 3) Invest in and develop our human capital. The AES strives to find answers needed by any New Mexican whether commercial growers, urban gardeners, city planners, ranchers, or homeowners. Almost 80% of appropriations are used to fund the equivalent of 199 faculty and staff spread over 310 permanent employees. Despite the general economic downturn, AES continues to leverage state appropriations so that over the past 10 years the Agricultural Experiment Station has consistently brought in \$1 to \$2 from other sources for every state dollar invested.

The Cooperative Extensions Service (CES) is the community education arm of New Mexico State University. CES is defined in state statute and within the state constitution, and further authorized by the federal Smith-Lever Act. The mission of the CES is to provide the people of New Mexico with practical, research-based knowledge and programs to improve their quality of life. CES faculty members are attached to all 33 county governments and many tribal areas in New Mexico. This effort involves over 400 faculty and staff in 54 offices around the state.

The subjects of CES educational programs are the fabric of life – social development of young people, human nutrition, environmental stewardship, economic development and community development. The most well-known CES programs are 4-H youth development, agriculture and natural resources, community economic development, and family and consumer sciences programs.

CES programs are grounded in research-based information and rely on NMSU statewide faculty members with specialty expertise. In addition to expertise in nutrition, family and child development, agriculture, natural resources, and economic development, the CES addresses emerging issues. CES has addressed homeland security, financial mediation, public official training, workforce readiness, health issues, and a host of natural resource issues. Statewide CES faculty members attract grant and contract funding to support educational programs throughout the state.

Academic Departments

Agricultural Economics & Agricultural Business
Agricultural & Extension Education
Animal & Range Sciences
Entomology, Plant Pathology and Weed Science

Family & Consumer Sciences
Fish, Wildlife and Conservation Ecology
Plant & Environmental Science
School of Hotel, Restaurant, and Tourism
Management

College of Arts & Sciences

The College of Arts and Sciences traces its origin to 1917 when it was known as the School of General Science. The present College of Arts and Sciences is comprised of 23 academic departments, the College Advising Center, Student Records and the Research Center. Administered by the dean and four associate deans, the College provides programs of research and creative endeavors in the arts, humanities, sciences, and social sciences.

Academic Departments

Anthropology	Criminal Justice	Mathematical Sciences
Art	English	Music
Astronomy	Geography	Philosophy
Biology	Geological Sciences	Physics
Chemistry & Biochemistry	Government	Psychology
Communication Studies	History	Sociology
Computer Science	Journalism & Mass Communications	Theatre Arts
Creative Media Institute	Languages & Linguistics	

Academic Programs

Aerospace Studies
Military Science
UNM/NMSU Cooperative Pharmacy Program
Women's Studies

Other Major Units

New Mexico State University

College of Business

The College of Business was created in 1964. The dean of the college assumes leadership of five academic departments and the Bureau for Business Research and Services. The College has the only Ph.D. Program in business in New Mexico, a unique professional doctoral program in economic development as well as four master's degree programs and eight undergraduate majors. The College has developed substantial research expertise focused on the state and regional economy, public utility regulation, leadership, workplace behavior, consumer behavior, obesity, bank and information security, marketing and advertising ethics, and applied statistics.

New Mexico State University

College of Education

The College of Teacher Education became the College of Education in 1967. The dean and associate deans of the College provide leadership for five academic departments and the Education Research & Budgeting (ERB). The undergraduate and graduate programs prepare individuals for licensure to work in public and private schools. The College, as a whole, is accredited by the State Department of Education within New Mexico and the Council for the Accreditation of Educator Preparation (CAEP).

New Mexico State University

College of Engineering

Engineering education was an early part of the course offerings of the New Mexico College of Agriculture and Mechanic Arts, now known as New Mexico State University. Leadership for the College of Engineering is provided by the dean, associate and assistant deans, and director of the Engineering Research Center. Today, there are six academic departments in the College. Research administered by the Engineering Research Center is a vital part of the College's activities. All of the programs in the College of Engineering are accredited by the Accreditation Board for Engineering and Technology (ABET), the nationally recognized engineering accreditation agency.

Academic Departments

Chemical Engineering	Industrial Engineering
Civil Engineering	Klipsch School of Electrical & Computer Engineering
Engineering Technology & Surveying Engineering	Mechanical & Aerospace Engineering

Other Major Units

Engineering Research Center
Waste-Management Education & Research Consortium

New Mexico State University

College of Health & Social Services

The College of Health and Social Services, established in 1979, is administered by the dean and associate dean. The College brings together fields of study that apply directly to the quality of life in a rapidly changing society. In addition to three academic departments, the College has a research center, which provides assistance to the faculty in the conduct of scientific research and professional training. A part of the College's School of Social Work is the Family Preservation Institute, an educational research and training center that engages in activities related to family preservation in multi-cultural settings. The College's Health Science Department is affiliated with the Southern Area Health Education Center (SoAHEC), Border Health Education Training Center (BHETC), Border Health Office (BHO), and the Border Epidemiology and Environmental Health Center (BEC).

New Mexico State University

Honors College

New Mexico's first Honors College was established in the Fall of 2004. The Honors College provides motivated undergraduate students with opportunities to enrich their academic programs. Small classes taught by master teachers engage Honors students in lively discussions and collaborative investigations of interdisciplinary topics. The Honors College does not offer a degree, but supplements the degrees offered by the university's six academic colleges by awarding various levels of honors distinction – core honors, university honors and distinction in university honors – to students who complete the prescribed honors track.

New Mexico State University

Graduate School

Although the first master's degree was awarded in 1897, the Graduate School was not formally established until 1956. The Graduate School offers 20 doctoral programs; 4 study areas for the education specialist degree; and 50 master's degree programs. The dean and associate dean provide the leadership for the Graduate School. Graduate faculty involvement in generation of academic policy and operating procedure is achieved primarily through the Graduate Council.

Graduate Degrees

Master of Accountancy	Master of Science in Chemical Engineering
Master of Agriculture	Master of Science in Civil Engineering
Master of Applied Geography	Master of Science in Electrical Engineering
Master of Arts	Master of Science in Environmental Engineering
Master of Arts in Teaching	Master of Science in Industrial Engineering
Master of Business Administration	Master of Science in Mechanical Engineering
Master of Criminal Justice	Master of Science in Nursing
Master of Fine Arts	Master of Social Work
Master of Fine Arts in Creative Writing	Specialist in Education
Master of Music	Doctor of Economic Development
Master of Public Administration	Doctor of Education
Master of Public Health	Doctor of Nursing Practice
Master of Science	Doctor of Philosophy
Interdisciplinary Doctorate	Interdisciplinary Master of Science
Interdisciplinary Master of Art	Molecular Biology (Interdisciplinary)

Graduate Certificates

Cultural Resource Management	Museum Studies
Digital Communications	Online Teaching and Learning
Digital Signal Processing	Public Utility Policy and Regulation
Electric Energy Systems	Systems Engineering
Finance	Telemetry

New Mexico State University

Library

NMSU Library is the primary provider of print and electronic information which supports learning, teaching, research and service at New Mexico State University. NMSU Library acts as a partner in the education process by providing access to information through its collections, information services, facilities, and staff.

Fiscal Year 2013-14	TOTAL

New Mexico State University

Budget & Finance

As a public institution, New Mexico State University is funded, in part, through an appropriation by the New Mexico legislature and the governor. The state budget approval process authorizes general fund appropriations as well as overall expenditure levels. General fund appropriations for Instruction and General (I & G) are largely the result of a workload-based funding formula and are made as a one lump-sum appropriation to each campus. In addition, line-item appropriations provide partial support for a number of research and public service activities of the university including the Agricultural Experiment Station, Cooperative Extension and the Department of Agriculture. The state also appropriates funds to New Mexico State University on a project-by-project basis for capital improvements.

New Mexico State University

Research

Since its founding as New Mexico's land-grant college in 1888, New Mexico State University has encouraged and supported research and creative scholarly activity of its faculty and students. The National Science Foundation ranks NMSU 3rd among High Hispanic Enrollment institutions nationally based on 2011 R&D expenditures. Most early research followed mandates of the founding legislation of land-grant colleges by generating knowledge useful in agriculture and engineering. Over time, however, research has expanded from this focus on applied natural sciences to include all disciplines of the university. Today, research and creative scholarly activities lead to basic scientific discoveries, as well as practical applications emanating from the natural and social sciences, arts, humanities, business, education, and health sciences in addition to engineering and agriculture. Faculty and staff engagement in research and creative scholarly activities enriches academic programs for students, provides training and employment opportunities, and attracts externally funded support to enhance university research, academic programs, and facilities.

To increase New Mexico State University's capacity to respond to critical state and national needs requiring interdisciplinary approaches, the university has identified the following core research areas:

- Agricultural and Life Sciences, including Animal & Range Sciences; Biochemistry, Molecular Biology & Genetics; Medical & Health Sciences; and Plant & Soil Sciences
- Electrical & Computer Engineering and Computer Science
- Space & Aerospace
- Sustainability, including Energy & Biofuels; Environment & Ecology; and Water

More information is available at <http://research.nmsu.edu/>.

Interdisciplinary research among colleges is fostered by college administration and the Vice President for Research.

New Mexico State University

Academic Centers and Research Institutes

Agriculture Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life.

Bureau for Business Research and Services provides business and economic research services to the public and private sectors of the state, region, and country and management services to business organizations and associations, government agencies and the public.

Chihuahuan Desert Rangeland Research Center (CDRCC) conducts educational, demonstrative, and experimental development with livestock, grazing methods, and range forage including investigation of the sustainability and management of natural resources and environmental ecosystems. CDRCC is a major source of arid land research.

Institute for Energy and Environment (IEE) is a multidisciplinary, energy sector and water resource institute serving the Southwest and beyond. IEE develops innovative solutions through the synergy of an academic, governmental and private sector partnership. IEE's ultimate goal is to provide global leadership, expertise, and technology for public policy, technical and human resource development to meet growing energy and water needs.

Manufacturing Technology and Engineering Center (M-TEC) supports economic development in New Mexico by providing quality manufacturing education, technical assistance, and other extension services to industries in New Mexico.

Physical Science Laboratory, a nonprofit research and development arm of NMSU, provides a wide variety of research and development services to support defense and space activities around the world.

Water Resources Research Institute's overall mission is to develop and disseminate knowledge that will assist the state and nation in solving water problems.

New Mexico State University (NMSU) is the lead institution for the New Mexico Space Grant Consortium (NMSGC). NMSGC is a member of the congressionally funded National Space Grant College and Fellowship Program which is administered by the National Aeronautics and Space Administration (NASA) in 1989.

The Energy Research Laboratory focuses on interdisciplinary research in renewable energies. Current efforts include developing fungible fuel and co-products from algae.

State of
New
Mexico

New Mexico State University

Office of International & Border Programs

First established in 1972, the Office of International & Border Programs' (IBP) primary task is to pursue the comprehensive internationalization of the university. This is defined as “the conscious effort to integrate and infuse international, intercultural, and global dimensions into the ethos and outcomes of postsecondary education” (NAFSA Task Force on Internationalization). As one of the seven strategic goals included in the Vision 2020 strategic plan, NMSU has made a laudable and serious commitment to “effectively prepare students for a global society.” It is IBP’s responsibility to work across traditional boundaries and disciplines, in constant collaboration with colleagues, departments, and community members, to achieve that goal. To accomplish this, the Associate Provost for International and Border Programs is responsible for coordinating all internationally-oriented programs, activities and services for both domestic and international students. This includes oversight of the Office of Education Abroad (OEA), International Student and Scholar Services (ISSS), the Center for English Language Programs (CELP), the Office of International Initiatives (OII), and the Confucius Institute (CI).

IBP’s vision is as follows: Our vision is to achieve a national reputation for delivering a diverse, interdisciplinary education where students understand, and have the ability to live and work with, people of various cultures, histories and languages. We must graduate individuals with the knowledge and skills to compete globally. We see a future where every student and faculty member has an international experience, where we prepare the next generation of leaders to meet global challenges.

IBP’s mission states that, “We see a future where every student and faculty member has an international experience, where we prepare the next generation of leaders to meet global challenges. IBP’s mission is to lead with an international focus in teaching, research, learning, and service, all integral to the mission of New Mexico State University. Our charge is to challenge the imagination, foster ideas, and provide leadership in international education.”

New Mexico State University

University Advancement

The New Mexico State University Foundation is a separate 501-C-3 non-profit entity administered by a volunteer board of directors. Its mission is to foster personal and corporate philanthropy, to continually excel in its fundraising performance, to be a prudent and productive steward of its endowments and honor its profound fiduciary responsibility to its donors – all within its commitment to serve and assist New Mexico State University in becoming one of the nation's best universities.

The Office of University Advancement, which includes the Alumni Association, Development and Advancement Services, carries out the Foundation's mission on a daily basis.

Aggie alumni are linked around the globe through the Internet at <http://alum.nmsu.edu>. There are chapters in the United States and Mexico. The International Board of Directors and the Executive Council set goals and policy for the Association. They encourage alumni to recruit students, promote active involvement on university boards and committees and foster mentoring/networking opportunities for alumni with current and prospective students.

Private philanthropy is the margin of excellence needed to continue the university's unique position as a doctoral research land grant institution. Gifts are solicited from alumni, individuals and friends of the university, foundations and corporations. Donors make gifts of cash, securities, real estate, tangible personal property, paid up life insurance, bequests, trusts, retirement plans and gifts in kind. Gifts are made to the NMSU Foundation. Details on making a gift can be found at <http://foundation.nmsu.edu>.

The current value of the pooled endowment fund is over \$130 million dollars with more than 1,100 separate endowed funds for scholarships, faculty enrichment and program support included in the pool. Each year more than \$8 million is transferred to the university which includes current use gift funds and earnings from the endowment.

Advancement Services maintains the alumni and friends database. They provide the accounting, receipting and reporting for all charitable gifts to the university and the Foundation. As the institutional memory, this office serves not only all alumni but also the colleges and departments on campus.

New Mexico State University

Community Colleges

Alamogordo Community College

Doña Ana Community College

Carlsbad Community College

Grants Community College

The community colleges are designed to help local citizens achieve their personal educational goals and to meet the job training needs of local business, industry, and government. The community colleges offer

- freshman and sophomore academic courses with credits that transfer to four-year colleges and universities,
- vocational-technical certificates and associate degree programs that provide students with basic job skills to enter the work force,
- adult basic education and developmental education to help students acquire basic skills in reading, English, and mathematics,
- noncredit community service and continuing programs for students seeking professional or personal enrichment.
